

There's always something to do with U3A Magnetic Island

We have a very active branch of the Townsville U3A on the island.

This worldwide movement provides learning and activities primarily targeting those in active retirement.

Our approximately 70 members take part in [classes](#) covering everything from languages (Spanish, French, Japanese), Creative Writing, Music through the recorder, Tai Chi, a Computer Users forum, to Science Classes (covering such subjects as climate change, plate tectonics, volcanics and global geology, oceanography, marine ecology, anatomy, botany, and physics).

U3A membership costs \$20 per year and covers all classes and activities.

There may be small additional costs associated with venues etc.
