

**Magnetic Island Nature Care Association (MINCA)** exists to help ensure that the species, habitats and biodiversity of World Heritage Magnetic Island and its adjacent waters are not damaged by human activity; and that development occurs in line with sustainability and the needs of future generations.

MINCA also works to re-vegetate, weed and manage areas on Magnetic Island, as well as lobby for good environmental policies and practices at all levels.

Their current projects include the new [low carbon diet](#) inter-bay challenge, plus the new '[Carb on Cuts](#)' short film competition.

To find out more, please contact Wendy Tubman by [email](#), visit their [website](#) or call **4758 1003**.

Donations to MINCA are tax deductible.
